Forecast for Wednesday 03 May 2023

Weather: Any early low cloud soon clearing and breaking, although any sunshine likely to be hazy due to extensive high cloud persisting. High cloud may break at times in the afternoon, to allow for some sunny spells. Staying dry.

Chance of cloud-free hill tops above 600m: 60% at first, increasing to greater than 90% during the morning.

Low Cloud and visibility: Slight risk of some early morning cloud above 500m, which will lift and break quickly through the morning, otherwise generally very good visibilities throughout with distant hills visible.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Generally a fine day to be out on the peaks, feeling chilly however close to the summits.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Wed 03 May 2023	0mm	0.2mm	6.4mm

Forecast for Thursday 04 May 2023

Weather: Some low cloud around to start which will quickly lift and give a fine and dry day, before outbreaks of rain spread erratically northeastwards across the park late afternoon or early evening. Winds picking up to a strong and gusty easterly wind.

Maximum wind: Easterly 25-28mph, with gusts of 40-45mph

Chance of cloud-free hill tops above 600m: 40% at first, rising to 90% for most of the day, before deteriorating to 30% late afternoon.

Low Cloud and visibility: Early morning cloud likely above around 500m, lifting and breaking quickly during the morning to give generally good visibilities with distant hills visible. Visibilities deteriorating in any outbreaks of rain during the afternoon

Temperature: **Valleys:** Plus 4 Celsius, rising to plus 12 Celsius
At 600m: Plus 3 Celsius, rising plus 9 Celsius
Freezing level: Above Summits
